Blue Hills Bancorp, Inc. Reports Second Quarter Earnings *Quarterly Dividend Increased 33% to \$0.20 per share*

NORWOOD, Mass., July 25, 2018--(GLOBE NEWSWIRE)- Blue Hills Bancorp, Inc. (the "Company" or "Blue Hills Bancorp") (NASDAQ: BHBK), the parent of Blue Hills Bank (the "Bank"), today announced net income of \$6.5 million, or \$0.26 per diluted share, for the second quarter of 2018 compared to net income of \$6.6 million, or \$0.27 per diluted share, for the first quarter of 2018 and net income of \$3.9 million, or \$0.16 per diluted share, for the second quarter of 2017. Net income on a non-GAAP basis was \$6.1 million, or \$0.25 per diluted share, for the second quarter of 2018 compared to net income on a non-GAAP basis of \$5.9 million, or \$0.24 per diluted share, for the first quarter of 2018 and net income on a non-GAAP basis of \$3.3 million, or \$0.14 per diluted share, for the second quarter of 2017 (see page 14 for a reconciliation of GAAP to non-GAAP measures).

For the six months ended June 30, 2018, net income was \$13.0 million, or \$0.52 per diluted share, compared to net income of \$11.4 million, or \$0.47 per diluted share for the six months ended June 30, 2017. Net income on a non-GAAP basis was \$12.1 million, or \$0.48 per diluted share, for the first six months of 2018 compared to net income on a non-GAAP basis of \$5.9 million, or \$0.25 per diluted share for the first six months of 2017 (see page 15 for a reconciliation of GAAP to non-GAAP measures).

The Company also announced that its Board of Directors voted to increase the regular quarterly cash dividend to \$0.20 per share from \$0.15 per share. The dividend will be payable on August 22, 2018 to stockholders of record as of August 8, 2018.

Commenting on the Company's results, William Parent, President and Chief Executive Officer of Blue Hills Bancorp, said, "The second quarter results continue to demonstrate the significant and ongoing progress we have made as the Bank reaches its four year anniversary as a public company. Our asset sensitive interest rate risk position has allowed us to absorb increases in deposit costs and still grow net interest margin over 20 basis points from the second quarter of 2017. In addition, since the second quarter of last year our core return on assets has increased over 70% to above 90 basis points while our focus on expense management has contributed to further improvement in our efficiency ratio, which has fallen to 62% excluding nonrecurring gains. Our business units continue to perform well in a highly competitive marketplace. Mortgage banking generated originations higher than a year ago and mortgage banking revenue exceeded \$1 million in the second quarter. Commercial business loans grew 8% from the end of the first quarter and 18% from a year ago as we strive to create more balance with our strong commercial real estate lending business, while on the consumer banking side we have positioned our core funding capabilities to meet our quality growth operating strategy."

Parent continued, "Our capital deployment efforts continued with today's announcement of another increase to our quarterly dividend. In the current environment, banks must be flexible and able to adjust to rapidly changing industry and economic conditions. We are all proud of the franchise we have built and as we move forward in this environment, we feel that our franchise will continue to create

incremental value for our shareholders."

BALANCE SHEET

Compared to March 31, 2018, total assets grew \$72 million, or 3%, to \$2.7 billion at June 30, 2018. The increase was mainly driven by a \$57 million, or 3%, increase in loans to \$2.3 billion at June 30, 2018. By category, the growth was due to a \$52 million, or 5%, increase in residential mortgage loans, a \$20 million, or 8%, increase in commercial business loans, and a \$15 million, or 21%, increase in construction loans. These increases were partially offset by a \$24 million, or 3% decrease in commercial real estate loans reflecting paydowns and very competitive market conditions.

Compared to June 30, 2017, total assets increased \$227 million, or 9%. Loans drove the growth in total assets from June 30, 2017, increasing \$196 million, or 9%. By category, the increase from June 30, 2017 was due to residential mortgage loans, which were up \$95 million, or 11%; commercial real estate loans, which were up \$68 million, or 9%; and commercial business loans, which were up \$41 million, or 18%. Residential mortgage originations were \$167 million in the second quarter of 2018 compared to \$139 million in the second quarter of 2017 while commercial loans (real estate and non-real estate combined)

added to the balance sheet were \$97 million in the second quarter of 2018 compared to \$137 million in the second quarter of 2017. The decline is due to a lower level of commercial real estate originations, partially offset by an increase in commercial business loan originations. The commercial real estate decline reflects a noticeable pick-up in competition with respect to loan terms and pricing during the first half of 2018.

Compared to March 31, 2018, deposits grew \$34 million, or 2%, to \$2.1 billion at June 30, 2018. The growth from the end of the first quarter was driven by a \$38 million increase in total brokered deposits and a \$21 million increase in certificates of deposit. These increases were partially offset by small declines in the other deposit account categories. In addition to the growth in deposits, short-term borrowings were up \$45 million, or 69%, from March 31, 2018 while long-term debt fell \$15 million, or 14%.

Compared to June 30, 2017, deposits grew \$147 million, or 7%, and included growth in all customer segments (consumer, small business, commercial and municipal). By category, the growth came from certificates of deposit, which were up \$163 million, total brokered deposits, which were up \$47 million, and NOW and demand deposits, which were up \$16 million. These increases were partially offset by a \$46 million decline in money market deposits and a \$33 million decline in regular savings deposits. Short-term borrowings increased \$110 million from a year ago while long-term debt declined \$40 million.

Stockholders' equity was \$400 million at June 30, 2018 compared to \$395 million at March 31, 2018 and \$397 million at June 30, 2017. The increases in both periods mainly reflect net income and share based compensation, partially offset by the payment of dividends.

NET INTEREST AND DIVIDEND INCOME

Reported net interest and dividend income was \$19.0 million in the second quarter of 2018, up \$624,000, or 3%, from the first quarter of 2018 and up \$2.6 million, or 16%, from the second quarter of 2017. Reported net interest margin was 2.98% in the second quarter of 2018, up from 2.91% in the first quarter of 2018 and from 2.75% in the second quarter of 2017.

Net interest and dividend income on a fully taxable equivalent basis (FTE), a Non-GAAP measure, was also \$19.0 million in the second quarter of 2018, up \$626,000, or 3%, from \$18.4 million in the first quarter of 2018, and up \$2.5 million, from \$16.5 million or 15%, from the second quarter of 2017. Net interest margin on a fully taxable equivalent basis (FTE), a Non-GAAP measure, was 2.99% in the second quarter of 2018 compared to 2.92% in the first quarter of 2018 and 2.76% in the second quarter of 2017. Purchase accounting accretion added \$171,000, \$200,000 and \$181,000 to net interest and dividend income in the second quarter of 2018, first quarter of 2018, and second quarter of 2017, respectively. Purchase accounting accretion also added 3 basis points to net interest margin in all three quarters.

Net interest and dividend income (FTE) and net interest margin (FTE) benefited in both quarterly comparisons from higher floating rate loan yields related to the interest rate increases announced by the Federal Reserve Bank. There have been seven rate increases announced by the Fed since December 2015 totaling 175 basis points. The Company has maintained and continues to maintain an asset sensitive interest rate risk position, which has resulted in earning asset yields increasing at a faster pace than interest bearing liability costs. In addition, the improvement in net interest and dividend income (FTE) from the second quarter of 2017 was helped by loan growth. Average loans increased \$163 million, or 8%, from the second quarter of 2017 due to higher levels of commercial real estate loans and residential mortgages.

NONINTEREST INCOME

Noninterest income was \$3.6 million in the second quarter of 2018, down 266,000, or 7%, from the first quarter of 2018. The decline was due to the absence of a first quarter securities gain of \$653,000, the absence of a first quarter gain of \$271,000 from the sale of premises and equipment and a decline of \$169,000 in miscellaneous income mainly reflecting lower income on Small Business Investment Company ("SBIC") investments. Partially offsetting these declines in the second quarter was a \$452,000 unrealized gain on equity securities compared to an unrealized loss of \$69,000 recorded in the first quarter and a \$293,000, or 40%, increase in mortgage banking income. The Company also had increases of \$67,000, or 19%, in deposit account fees and \$63,000, or 16%, in interchange and ATM fees reflecting higher transaction volumes and pricing changes.

Compared to the second quarter of 2017, noninterest income declined \$878,000, or 19%. This was mainly due to a \$1.2 million decline in loan level derivative income, which is related to a lower volume of new commercial loan customer back-to-back interest rate swap contracts. The amount of revenue in the loan level derivative income category can be volatile since it is a

function of the amount of commercial loans that customers opt to convert from floating to fixed rate via interest rate swaps in any given quarter. Also contributing to the decline was the absence of a \$928,000 gain recognized in the second quarter of last year on the sale of the Company's remaining available-for-sale debt securities portfolio. Partially offsetting the declines were an \$866,000 increase in miscellaneous income due primarily to SBIC investments, a \$452,000 unrealized gain on equity securities recognized in the second quarter of 2018, and increases of \$81,000 in deposit account fees and \$66,000 in interchange and ATM fees.

NONINTEREST EXPENSE

Noninterest expense was \$13.7 million in the second quarter of 2018, down \$180,000, or 1%, from the first quarter of 2018. Several categories of expenses had declines from last quarter and these declines were partially offset by an increase in advertising expense, which was at a low level in the first quarter. Compared to the second quarter of 2017, noninterest expense increased \$325,000, or 2%. The increase was mainly driven by higher salaries and benefits expense which was up \$600,000, or 8%. The growth in salaries and benefits expense was due, in part, to an increase in full time equivalent employees to 245 at June 30, 2018 from 230 at June 30, 2017 as well as merit increases.

INCOME TAXES

The effective income tax rate was 26.8% in the second quarter of 2018 and 25.6% in the first quarter of 2018. This is down from 39.9% in the second quarter of 2017. The lower effective tax rates in 2018 are mainly due to the Tax Act, which was enacted on December 22, 2017 and provided for a reduction in the federal corporate income tax rate from 35% to 21% effective January 1, 2018.

ASSET QUALITY

The provision for loan losses reflects management's assessment of risks inherent in the loan portfolio. The provision for loan losses was \$101,000 in the second quarter of 2018 compared to a credit of \$460,000 in the first quarter of 2018 and a provision of \$1.1 million in the second quarter of 2017. The decline in the provision from 2017 reflects lower loan growth in 2018 coupled with the impact of the Company's continued migration from the use of historical loss rates based on national FDIC data to loss rates based on the Company's own experience.

The allowance for loan losses as a percentage of total loans was 0.89% at June 30, 2018 compared to 0.92% at March 31, 2018 and 0.97% at June 30, 2017. The Company had net loan charge-offs of \$161,000 in the second quarter of 2018 compared to \$232,000 in the first quarter of 2018 and \$76,000 in the second quarter of 2017.

Nonperforming assets were \$13.9 million at June 30, 2018 compared to \$13.3 million at March 31, 2018 and \$12.8 million at June 30, 2017. Nonperforming assets as a percentage of total assets were 0.51% at June 30, 2018 compared to 0.50% at March 31, 2018 and 0.51% at June 30, 2017.
